Generate questions you have about your assigned topic.

Put one question PER sticky note!

MY guiding question: _____

- **1 slide each:** Each group member must design and create one slide for your final presentation. This does **not** include the title slide or any photos. This is a total of *at least 4 slides!*
- **Individual Accountability:** Each group member will present his/her own slide and be individually assessed.
- **At least 4 sources:** As a group, you must use at least FOUR sources (one source per person). You can use Wikipedia as a starting point, but it cannot be counted as one of the group's four sources.
- **Synthesis of information:** Students will be taking notes as you present. Be mindful of including only pertinent information. Do NOT just copy and paste chunks of paragraphs.
- **Proper Citation:** Include the MLA citation of the source(s) used at the bottom of your slide. Use EasyBib or another online citation source if you don't know how to do this.
- **Quiz questions:** You will need to create 5 multiple choice questions (with 4 answer options) about your presentation. Email these questions and the key to me before your presentation.

OPTIONAL: Your group is allowed to include one informative video. The video will not count toward your slide count and should only be included if it provides information that could not be presented in PowerPoint form. The video or clip needs to be less than three minutes.
