# Theme:

- From the book, I would explain the author's main message as if you want something you have to give up something in return. This is displayed in the book when Westerfeld says, "Your personality-the real you inside- is the price of beauty." This explains that when you become pretty you will lose who you really were before only focus on the looks.

# Ideal Reader:

- An ideal reader for this book is any gender because its Sci-Fi action and both genders can like it. The age I would recommend is middle school and up because it might be confusing for the ages younger than that. If you're reading this book you would want to be interested in futuristic and action packed books. If you fit under these categories then Uglies would be a perfect book to read and there are 3 more books in the series!

# Movie:

- I defiantly think that Uglies should be made into a movie because after reading this book you would want to know if what you thought all the places, people and scenes looks like would be similar in this futuristic movie.
- Tally Youngblood: Jennifer Lawrence
- Dr. Cable: Emma Stone
